NATURE UNDER ASSAULT: 80% DECLINE IN FRESHWATER FAUNA POPULATION; LATIN AMERICA WORST HIT WITH 90% LOSS OF WILDLIFE

Relevant for: Environment & Disaster Management | Topic: Environmental Degradation - Wildlife related issues

A green sea turtle hatchling is seen in Archie Carr National Wildlife Refuge in Florida in this handout photo provided on Septemebr 1, 2015 by University of Central Florida, Gustavo Stahelin. | Photo Credit: Reuters

The World Wildlife Fund and partners have tracked population changes in Earth's animal species for decades. News from the latest **"Living Planet" report**, released on October 30, is more grim than ever.

Here are key findings:

The Tamil Nadu government made this submission before the National Green Tribunal on October 28
