

YEAR-END- REVIEW OF MINISTRY OF HEAVY INDUSTRIES – 2021

Relevant for: Indian Economy | Topic: Issues relating to Growth & Development - Industry & Services Sector incl. MSMEs and PSUs

The Ministry of Heavy Industries (MHI) has been continuously working towards making the auto sector in India 'Aatmanirbhar' by augmenting 'Make in India' efforts of the Government and to position India as an alternative manufacturing hub for automobiles and its components. The key initiatives of Ministry of Heavy Industries during the year are as under:

After remodeling of FAME II in June 2021 sale of electric two wheelers has increased to over 5000 per week from 700 per week before remodeling.

Achievements under FAME India II scheme in this year

Other Initiatives

A 11 .3 km long, Asia's longest high-speed track (HST) was inaugurated at NATRAX, Indore, Madhya Pradesh by Hon'ble Minister (HI&PE) on June 29, 2021. This will be a one stop solution for all sorts of high speed performance tests for automobiles within the country. Availability of NATRAX HST will encourage indigenous development of wide variety of automobiles.

In compliance of directives of Cabinet Secretariat for digitization of official records, the work of digitization of more than 15 Lakh pages (accumulated since inception of the project) were completed in Nov 2021 for NAB (NATRIP)/HQ. This is a major work accomplished by NAB (NATRIP) organization in time bound manner.
