

## India ranks 116 out of 157 nations on SDG index

UNITED NATIONS: [India](#) is ranked 116 out of 157 nations on a global index that assesses the performance of countries towards achieving the ambitious sustainable development goals (SDGs).

The [SDG](#) Index and Dashboards Report produced by the Sustainable Development Solutions Network (SDSN) and the Bertelsmann Stiftung shows that [world](#) leaders need to strengthen their joint efforts to realise the 17 global goals.

"Not only does a rising trend of nationalism and protectionism impede the implementation of the goals, but as the report shows, industrialised countries are not serving as role models," the report added.

It said many of the richest countries in the world are nowhere near achieving the global policy objectives but also deteriorate the implementation process for poorer countries because of negative spillover effects.

India is ranked 116th on the index with a score of 58.1, behind countries such as Nepal, Iran, [Sri Lanka](#), Bhutan and [China](#). [Pakistan](#) is ranked 122.

The report said that the countries which are closest to fulfilling the goals are not the biggest economies but comparably small, developed countries.

Sweden leads the list, followed by Denmark and Finland. Among the G7 countries, only Germany and France can be found among the top ten performers. The [United States](#) ranks 42nd on the Index, while Russia and China rank 62nd and 71st respectively.

"One of the greatest obstacles to achieving the global goals for high-income countries are poor performances regarding sustainable consumption and production. All countries that score lowest on electronic-waste generation, for example, are high-income countries," it said.

Bertelsmann Stiftung chairman and CEO Aart De Geus said the report's findings show that politicians, businesses and society altogether must urgently intensify their efforts and commit themselves to this agenda.

"SDG Index and Dashboards highlight the need for urgent action on the part of G20 countries in making sustainable development a reality both within and beyond their borders. If the world is to achieve the SDGs, all countries must take up the goals as part of their national development strategies, and ensure that they take responsibility for their impact on the rest of the world," said Jeffrey D Sachs, Director of the SDSN.

The SDG Index and Dashboard collect available data for 157 countries to assess where each country stands in 2017 with regard to achieving the SDGs.

The SDG Index ranks countries based on their performance across the 17 Sustainable Development Goals.
