A New India is rising; it is an India that stands on the pillars of economic opportunity for all, knowledge economy, holistic development, and futuristic, resilient and digital infrastructure: Prime Minister Shri Narendra Modi at Opening Ceremony of Third Annual Meeting of AIIB

PM calls upon AIIB to expand from financing 4 billion dollars, to 40 billion dollars by 2020 and 100 billion dollars by 2025

In a gentle way, you can shake the world – Union Minister Shri Piyush Goyal recalls Mahatma Gandhi’s words, noting that AIIB is gently shaking the world

Posted On: 26 JUN 2018 5:29PM by PIB Mumbai

The Prime Minister, Shri Narendra Modi has said that a ‘New India’ is rising – an India that stands on the pillars of economic opportunity for all, knowledge economy, holistic development, and futuristic, resilient and digital infrastructure. The Prime Minister said that India, being one of the most investor-friendly economies in the world, has emerged as a bright spot in the global economy. He said, “With a size of 2.8 trillion US Dollars, it is the seventh largest in the world. It is the third largest in terms of purchasing power parity. In the fourth quarter of 2017, we grew at 7.7 per cent. In 2018, we are projected to grow at 7.4 per cent.”

The Prime Minister was addressing the Opening Session of the 3rd Annual Meeting of the Asian Infrastructure Investment Bank (AIIB) in Mumbai today.

The PM said that India is happy to have this opportunity to deepen its engagement with AIIB and its members. He recalled that AIIB started its financing operations in January 2016 and in less than three years, it has 87 Members in its fold. Shri Modi further said, “With a committed capital of 100 billion dollars and huge need for infrastructure in Member Countries, I take this opportunity to call upon AIIB to expand from financing 4 billion dollars, to 40 billion dollars by 2020 and 100 billion dollars by 2025”.

Lauding the efforts of AIIB, the Prime Minister said, “India and AIIB are both strongly committed to making economic growth more inclusive and sustainable. In India, we are applying novel Public Private Partnership models, Infrastructure Debt Funds,

and Infrastructure Investment Trusts to fund infrastructure.”

Speaking further on the occasion, the Prime Minister said that India is trying to develop brownfield assets as a separate asset class for infrastructure investment. Such assets, having passed the stages of land acquisition and environment and forest clearances, are relatively de-risked. Hence, for such assets, institutional investment from pension, insurance and sovereign wealth funds are likely to be more forthcoming, noted the PM.

The Prime Minister said, “Our macro-economic fundamentals are strong with stable prices, a robust external sector and a fiscal situation firmly in control. Despite rising oil prices, inflation is within the mandated range. The Government is firmly committed to the path of fiscal consolidation”. The Government debt as a percentage of GDP is also consistently declining, he added.

Counting India as an extremely low-risk political economy from a foreign investor’s perspective, the Prime Minister, Shri Modi said, “The Goods and Services Tax (GST) is one of the most significant systemic reforms that our country has undergone. It works on the One Nation – One Tax principle. It reduces tax cascading, increases transparency, and adds to logistics efficiency. All of this makes it easier for the investor to do business in India.”

He said that the size and growth of the Indian market hold much potential. India's per capita income has doubled in the last ten years. We have over 300 million middle class consumers. This number is expected to double in the next ten years. The size and scale of requirement in India gives the added advantage of economies of scale for investors, said the Prime Minister.

Observing that agriculture is the lifeline of the Indian economy, the PM said that the Government is promoting investments in warehouses and cold chains, food processing, crop insurance & allied activities.

Earlier, welcoming the Prime Minister, the Union Minister for Railways, Coal, Finance and Corporate Affairs, Shri Piyush Goyal, in his initial remarks said that the newly emerging institutions have the potential to redefine the contours of multilateral financing and set new rules for engagement. He said that multilateralism has helped the world achieve inclusive economic growth across countries at different stages of development. The Finance Minister said that we need to strengthen the multilateral cooperation to help us meet the challenges of climate change, economic slowdown in some parts of the world and rising protectionism.

Holding inclusive growth as the key element, the Finance Minister, Shri Goyal said there is a need to develop faster processes for loan disbursement as India is a leading emerging economy and favoured investment destination.

Over the five-year period of 2017-2022, India will need US\$750 billion for energy, transportation and urban development and we have budgeted infrastructure spending of US\$90 billion for 2018-19. AIIB will be an important pillar in meeting this requirement, Shri Goyal concluded.

Earlier, in his address, AIIB President, Mr. Jin Liqun said, “Between now and 2030, Asia investment in infrastructure must rise to US\$2 trillion a year, or roughly triple of what it has been in the past.”

“Asian developing countries now account for 60% of global growth, while roughly two-thirds of global trade is part of value-chains passing through Asia. Yet still today, 11% of Asia’s population remains in poverty. It is against this backdrop that AIIB was formed. Economic openness and investment in infrastructure drew Asia’s growth in previous stages. Now, much more needs to be done to ensure the future continues to brighten for all of Asia”, Mr. Liqun added.

In conclusion, Mr. Liqun said ,”Solid global growth is crucial for our members to meet their objectives and an open trading system is a foundation of that global growth. I look forward to working with all of you towards this end”.

Industries Department, Government of Maharashtra is the nodal Department, Maharashtra Industrial Development Corporation (MIDC), Government of Maharashtra is the nodal agency, Confederation of Indian Industry (CII) is the Professional Conference Organiser (PCO), Research and Information Systems for Developing Countries (RIS) is the knowledge partner, Federation of Indian Chambers of Commerce & Industry (FICCI) is the Exhibition partner for the 3rd Annual Meeting of AIIB.

In the past, AIIB Annual Meetings were held at Beijing, China in 2016 and Jeju, Republic of Korea in 2017.
