

# PUNJAB, T.N., KERALA TOP EDUCATION INDEX RANKING

Relevant for: Developmental Issues | Topic: Education and related issues

This is the third edition of the index and uses 70 indicators to measure progress. Of these, the 16 indicators related to learning outcomes remain unchanged through all three editions, as they are based on data from the 2017 National Achievement Survey, which tested students in Classes 3, 5, 8 and 10.

The next NAS was scheduled to be held in 2020, but was postponed because of the pandemic.

The remaining 54 parameters use Central databases, collating information from the school and district level, and have been updated for 2019-20.
