

TRIFED, UNICEF & WHO PROMOTE HEALTH WITH LIVELIHOOD ACTIVITIES THROUGH A FOCUSSED VACCINATION CAMPAIGN IN TRIBAL DISTRICTS

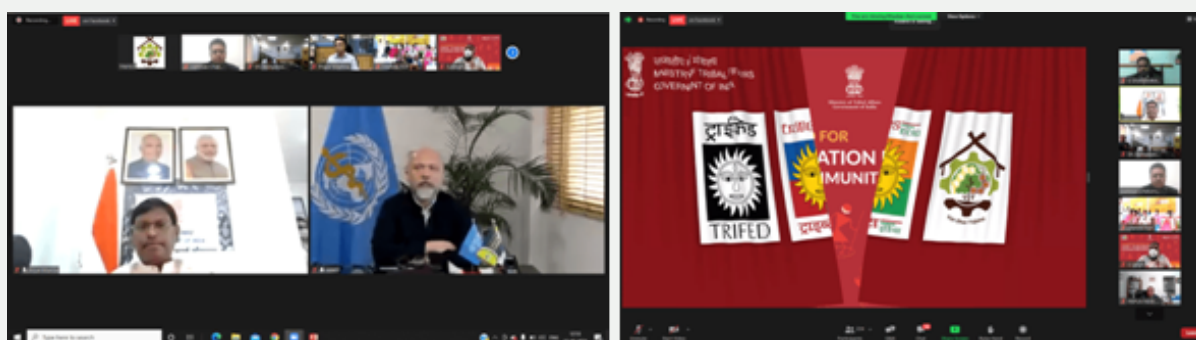

Relevant for: Developmental Issues | Topic: Health & Sanitation and related issues

Key Highlights:

The “COVID Teeka Sang Surakshit Van, DhanaurUddyam” campaign was virtually launched by Shri Arjun Munda, Minister for Tribal Affairs, Government of India on 15th July, 2021 to accelerate the pace of Covid vaccination among tribal communities of India. The campaign was launched through video conferencing link-up with field camps in Mandla in Madhya Pradesh and Bastar in Chhattisgarh in the presence of Shri Fagga Singh Kulaste, Minister of State for Steel; Ministers of State for Tribal Affairs, Smt. Renuka Singh and Shri Bishweswar Tudu; MD TRIFED Shri Pravir Krishna; Dr. Roderico Ofrin, WHO Representative and Dr. Yasmin Ali Haque, UNICEF India Representative and other dignitaries.

TRIFED in collaboration with UNICEF and WHO has planned to roll out this campaign across the country, with the help of partner agencies at State level in tribal districts. The campaign targets to leverage the 45,000 Van Dhan Self Help Groups (VDSHG) of the Tribal Co-operative Marketing Development Federation of India (TRIFED) to promote livelihoods with health. This campaign is designed to connect tribal communities from across the country emphasizing that the COVID-19 vaccination is free, available in the nearby centres and not only protects people from hospitalization cost and death but also helps them to continue with their bread earning activities.

As an outcome of this campaign undertaken by TRIFED in association with UNICEF and WHO, it is estimated that approx. 6.73 crores vaccinations were administered in tribal districts.

The campaign is based on 3 J's:

The aforesaid campaign focusses on reassurance, pride and self-efficacy. Its motive is to fast track the activities of Van Dhan Self-Help Groups, and accelerate the pace of COVID vaccination among tribals engaged in procurement, value addition and marketing of handlooms, handicrafts and forest produces. The campaign leverages the strength and network of Self-Help Groups and other common touch points – Common Service Centres, fertilizer outlet centres, Haats and Bazaars, VDSHG's etc. It employs publicity measures in local languages to promote vaccine uptake and COVID Appropriate Behaviour.

The campaign also uses non-traditional partnerships and community reach for mobilization and collective action such as involvement of traditional leaders and incentivize adoption of vaccines through local health structures and TRIFED's influencers in tribal districts. A series of webinars in this regard has also been conducted covering all the states with about 3000 participations from VDSHG's, Clusters, representatives of SIA, SNA, SFURTI TA, UNICEF, WHO, Suppliers, District administration, local influencers of the respective regions.

This was followed diligently by organising various awareness campaigns physically in about 80 tribal districts across the country. About 150 TRIFED's influencers were identified in tribal districts to support the campaign by driving the tribals to get vaccinated.

As an outcome of this campaign undertaken by TRIFED in association with UNICEF and WHO, it is estimated that approx. 6.73 crores vaccinations were administered in tribal districts.

The campaign is targeted to overcome two challenging waves, gained experience and are determined to stop the third wave in tribal districts, free of COVID infection and restrictions on livelihood activities.
